

I can not believe you would like to change Satellite Radio. We have had our XM since Christmas and we love it. When we take trips we can listen to several different things, rather than constantly changing our CD's. We listen to the traffic and weather station quite often especially when we are taking trips. We were listening to it when we went to Nevada. It was snowing quite hard and that's what made us decide to stay somewhere. We live in a small town that does not have any good radio stations, that is what made us decide to get XM. So please don't change anything about it! Thank you!
